Educational Technology - Summer 2018
Misaligned Expectations: Catalog

Alan Franzoni
Hasti Ghabel

July 29, 2018

Project repository

This is the repository that we used to share our work:

https://github.com/alanfranz/cs6460-teamcsse/

Some descriptions for relevant folders:

- *Exemplary Past Proposals*: Where we collected some of the examplary proposals, to use as a reference;

- *Final Project*: sources for the presentation and the final paper;

- *Milestones*: sources for milestones;

- *Survey Questions*: drafts for the survey;

- *data-analysis*: R scripts and cleaned data for the final paper; the **answers_pare.R** script contains the data analysis, producing a series of dataframes holding the data counts and percentages, while the **plots.R** script contains the functions used to create the plots. Other experiments exist, there;

- *other-research-proposals*: some research proposal fetched from the class library; they were put here to read and find inspiration for the difficult part of creating our own proposal;

- *papers*: Most of the papers we've used in our proposal and final papers;

- *resources*: other resources we've read while trying to create our proposals;

- bibliography.bib: our compelte bibliography in biblatex format.

Website source

This contains the static generator source for our website:

https://github.com/alanfranz/teamcsse-secondtry/

It uses the Jekyll static website generator and the Forestry frontend.
